

## Building a Fence - Fence Height Regulations

A fence is defined in the Zoning Bylaw as a vertical structure used for enclosure or screening where the thickness is equal to, or less than, 8cm (0.26 ft.) excluding top and bottom rail posts. Height is measured from finished grade.

The illustration below indicates maximum fence heights as applied to a typical residential lot:

This handout is prepared for your convenience as a general guide to the requirements for fences and walls in the City of Port Coquitlam. Please consult the Zoning Bylaw, 2008, No. 3630 for specific requirements.
