Dear Property Owner(s) and Resident(s):

CITY OF PORT COQUITLAM
ENGINEERING
PRO: 2026-05

Re: 2026 Pavement Rehabilitation Program

Please be advised that the City will be completing pavement rehabilitation in your neighbouhood, as part of our 2026 Pavement Rehabilitation Program. Works are expected to start in early September 2026 and take approximately one week to complete for each site. However, construction duration for each site may vary depending on the specific nature of work required at each particular site.

The general scope of work includes new pavement resurfacing, pavement structure rehabilitation where necessary, re-instating pavement markings, and concrete and drainage works where necessary. Locations that are included in the scope of this project include:

- Oxford Connector from Esso station to Lougheed Highway
- Pitt River Road from McLean Avenue to Cameron Avenue
- Glasgow Street from Salisbury Avenue to Dorset Avenue
- Cambridge Street from Westminster Avenue to Lougheed Highway
- Westminster Avenue from Cambridge Street up to approximately 40 metres to the east
- Dominion Avenue from Nile Gate to the Traboulay Trail head

The purpose of this project is to install a top lift of pavement where it is missing and to improve the overall condition of City roads which have deteriorated over time. These roads were identified as requiring rehabilitation as part of a pavement condition assessment which was completed.

Although we will attempt to minimize major inconveniences to property owners, typical construction delays and disruptions may occur due to the nature and extent of the proposed work. We appreciate your patience as we complete these works.

You may view additional information for these specific projects by visiting portcoquitlam.ca/capitalprojects or use the QR code provided, and select the 'Pavement Rehabilitation' project.

Should you have any questions related to the proposed works, please contact the undersigned.

Regards,

Matteo Santorelli
