Dear Property Owner(s) and Resident(s):

**Re: Notice of Construction Night Pumping  
Sanitary Trunk Sewer Replacement (Westwood St to Kingsway Ave) - Run 1**

---

In order accommodate the construction of our ongoing sanitary trunk sewer, sections of sanitary sewer will require the setup of bypass pumping systems. This will involve the setup of pumps at designated locations, as denoted in *Figure A*, and operating them throughout day time and night time hours. The intent of this letter is to inform residents that although disruptions are expected to be minimal, some level of noise is to be expected from the operation of these pumps during this period.

The bypass pumping setup is scheduled to start running on May 26, 2025 and will run for 24/7 for approximately one week at each location. The actual duration may vary based on how construction of the segment of sewer advances. These pumps will be fitted with noise attenuation features as to limit the noise that is emitted from the pumps.

We apologize for this inconvenience in advance and thank you for your patience as we complete these works.
